

## GSE Services

**Howell's GSE Service program provides full-scale repair and overhaul of ground support equipment tailored to your specific requirements.**

### Proven Experience

With more than a half a century of innovations and industry experience, Howell integrates proven ability and cutting-edge technology to engineer solutions for your aviation needs. Our knowledgeable staff of GSE technicians has over 60 years direct experience in aviation and airport equipment repair.

### Quality Parts and Service

As a privately-owned company, we have the flexibility, contacts, resources and knowledge to procure the right parts quickly and economically. We have the facilities, equipment and engineering experts to effectively deal with design and obsolescence issues, and to fabricate new parts as needed. We deliver a fully refurbished, recertified unit more quickly and cost efficiently than our competitors.

### Expert Support

Unparalleled customer support means that Howell's commitment to quality continues from start to finish. Our team will design a customized plan according to your specific needs. And once the job is complete, Howell will continue to provide support far beyond delivery.

# GSE SERVICES

## QUALITY SERVICE YOU CAN COUNT ON

Our GSE experts have the experience, ability and resources to completely overhaul post-theatre ground support equipment and get it back into service quickly and reliably. Our team will visit you on-site to assess equipment and provide a customized plan for your specific requirements.

Once in house, each piece of equipment is thoroughly evaluated, tested and diagnosed including wires, switches, plates, panels and electrical system components. Because of our exceptional resources, 98% of the repairs are conducted in-house. Once repairs are complete, all equipment is 100% recertified prior to delivery.

You get a quality, cost effective product you can count on for dependability and optimum performance.

We repair any brand, make or model as well as non-traditional, non-standard equipment:

- Belt loaders, cargo dollies
- Cabin pressurization units
- Cargo loaders
- Engine stands
- Ground power units
- Heaters, air conditioners
- Hydraulic power units
- Industrial generators
- Lifts, jacks, fork lifts
- Load testing
- Maintenance Stands, B1, B5
- Non-powered equipment
- Push backs
- Scissor lifts
- Tow bars
- Tugs, tractors, transport units
